“Soon, a glorious new barn will assume the duties and responsibilities of its forebearers.”

On the cover: Beginning in the 1950s, Lamplighter’s founders developed a campus, a curriculum, and a community that focused on giving students a strong foundation. An important part of that was a barn with chickens and animals that provided various ways of educating students. Lamplighter’s new barn, enhanced with a unique and dynamic design, shown on the cover, opens this fall. Thanks to the community support of the comprehensive fund-raising Campaign, a result of the School’s Strategic Plan, Trustees and Administrators considered the students and their needs now and into the future. Annual Report 33
Dear Lamplighter Community:

The opening of this 63rd school year of The Lamplighter School has been the best ever! Our days with your sons and daughters are truly joyful. Students, faculty, and staff have settled into that familiar hum of school life. I am pleased to report that the construction project is fully in process, and both the barn and Innovation Lab are scheduled to open this school year with the farm animals joining the chickens at the appointed time after construction. With guidance from the Board of Trustees, we are not only meeting but also exceeding the majority of the goals identified in the Strategic Plan.

The work in which the school is engaged could not have been initiated without a strong and positive school culture where input from the community is expected and encouraged. At a time when norms, mores, and culture are sometimes unclear, The Lamplighter School culture is clear and serves as both an anchor and guiding star as we move forward.

The School beckons every member of the community to be part of something big, and yes, something very important; that is, the education of our students. The care that is taken in the development of the curriculum ensures that the proper amount of emphasis is placed upon both core and special-area subjects thereby creating an integrated whole. This stability allows faculty and students alike to pilot new ways of teaching and learning.

The social-emotional curriculum is given equal emphasis, and for the youngest learners, it is arguably “the curriculum.” The culture of our school incorporates the values of community. Families new to Lamplighter report that “Lamplighter pulls you in from the very beginning. Parents are invited to join and participate in everything.” Many family friendships begin when students are in the Early Childhood program and become lifelong.

Lamplighter is a school where new thinking and innovation has been championed since its founding.

Lamplighter is a school where new thinking and innovation have been championed since its founding. Current research defines eight characteristics to better understand the mindset of the innovator: The first characteristic is empathy, the ability to emotionally connect with others. Second, innovators are problem-finders. They tend to notice when processes, procedures, or items do not work as well as they could. Problem-finders start with lots of questions and almost always end with a theory that will eventually become an answer. Third, many innovators are risk takers. When given the choice, more often than not the person with the mindset of an innovator will select a different path over the beaten path. Fourth, innovators network with others. A fifth characteristic of an innovator is the keen ability to observe.

The sixth, seventh, and eighth characteristics are creativity, resilience, and the ability to reflect on past successes and challenges. Our students are definitely developing the mindset of an innovator. The project-based learning and human-centered design thinking work in which we are engaged with our partner in education, Southern Methodist University, will enable us to further expand upon this way of knowing in our students.

We are off and running! Our students are engaged in purposeful learning, and I cannot wait to report on our progress.

Sincerely,

Joan Buchanan Hill, Ed. D.
Head of School
Dear Lamplighter Community:

I am delighted to be serving as Chair of the Lamplighter Board of Trustees this year. Having been a Lamplighter parent for 16 years and in my sixth year of service on the Board in a variety of roles, I began my Board Chair term last May. My business experience is in the financial industry, and in addition to my work with Lamplighter, I currently serve on the boards of Holy Angels Residential Facility and KIPP DFW Charter Schools.

My husband Russell and I have two daughters and a son. My daughter Sloane (2008), graduated from Hockaday last spring and is a freshman at the University of Texas at Austin, majoring in a combination of Honors Business and Plan II. Shea (2011) is a sophomore at Hockaday and is currently abroad on Swiss Semester; and our youngest, John, is very much enjoying his senior year here at Lamplighter.

It is an honor and pleasure to serve at such an exciting time in Lamplighter’s history. In 2011, our Lamplighter community became proud owners of the land and buildings we currently occupy. As many of you may remember, the Board of Trustees and Head of School partnered with Lamplighter’s constituencies in 2012 and created a strategic plan entitled “Lighting Our Path” as a guidepost to identify and address needs. Students and faculty were our inspiration as we launched our resulting “Igniting Young Minds for a Lifetime of Learning Campaign to Fund People, Place, and Programs” capital campaign. The Campaign is well underway; and everyone in our community will have an opportunity to participate and help make the strategic vision a reality. Through the ongoing hard work of so many in our Lamplighter community, the innovative vision outlined in the strategic plan will come to fruition this school year. Exciting times indeed!

Our Igniting Young Minds Campaign proceeds will increase our endowment, improve our programs, and expand our marvelous campus with the new Barn and Innovation Lab. A cruise around the beautiful new ring road offers a terrific view of the facility improvements that are well underway. While there is still a bit of work needed to complete the gambrel-style barn with its cantilevered chicken coop, we are getting very close. This modern barn will house up to forty-five chickens and include areas for egg processing and refrigeration, computer stations for data recording, and a storage loft. There will also be an adjacent pen to welcome our precious farm animals back from their world tour.

My family and I cherish Lamplighter, and we are excited about its future. Thank you for the opportunity to be involved.

With Lamplighter spirit,

Sarah Weinberg
Board Chair

The Campaign has already allowed us to increase our endowment, improve our programs, and expand our marvelous campus with the new Barn and Innovation Lab.
Dr. Kelvin Baggett  
Certified by the American Board of Internal Medicine, Dr. Kelvin Baggett completed his training in internal medicine at Yale University and his dual fellowships as a general internal medicine fellow at Duke University and as a Robert Wood Johnson Clinical Scholar at Johns Hopkins University. In addition to his medical education, he also earned his M.P.H. from the Johns Hopkins Bloomberg School of Public Health and an M.B.A. from the Fuqua School of Business at Duke University. Nationally recognized as a leading physician executive in healthcare, Dr. Baggett has spent his career improving the quality, safety, and efficiency of clinical performance and patient outcomes at acute care hospitals and surgery centers around the country. Outside of medicine, Dr. Baggett has also gained education-related experience through his advisory work with the Perot Museum of Nature & Science, the St. Philip’s School, and the Duke University Fuqua School of Business. He and his wife Dia have two children, Lael and Caleb.

Dr. Steven Clark ’88  
A native of Dallas, Dr. Steven Clark attended both Lamplighter and the Greenhill School before receiving his Bachelor of Science degree in Biology from Morehouse College in 2000. He returned to Texas to attend medical school at UT Southwestern and to start his formal surgical training at Methodist Dallas Medical Center, where he completed a five-year general surgery residency and held the position of chief resident his senior year. After completing the first round of his surgical education, Dr. Clark continued to demonstrate his passion for his profession by completing two additional fellowships in hand surgery and plastic surgery at UT Southwestern and Tulane University, respectively. In addition to his advanced training at some of the nation’s most prestigious institutions, he has also authored numerous journal articles and presented research at various industry conferences. Proud parents of a daughter and twin boys, Dr. Clark and his wife Sharon enjoy a rich family life at their home in Carrollton.

Margaret Hirsch ’89  
As the President of the Hirsch Family Foundation, Margaret Hirsch has been a passionate advocate for programs that work to support a child’s ability to obtain a meaningful education. She currently serves on a number of education-related boards throughout the Dallas area and formerly worked as the Executive Director of Government Relations for the National Math and Science Initiative, a national non-profit dedicated to improving student performance in science, technology, engineering, and math fields. Prior to her extensive work involving education, Hirsch also practiced law at Hughes & Luce in Dallas after receiving her J.D. from the University of Texas at Austin, earning her B.A. from Princeton University, and most importantly, after graduating from The Lamplighter School in 1989.

Bill Payne  
Bill Payne graduated from Washington and Lee University in 1988 with a B.S. in Business Administration and Accounting and earned his M.B.A. from Northwestern University’s Kellogg School of Management in 1993. Since 2009, Payne has served as president of several privately held businesses, including Druid Hills Capital, an investment management firm. Prior to 2009, he worked for Arthur Andersen; Donaldson, Lufkin & Jenrette; Credit Suisse First Boston; Morgan Stanley; and several other firms, primarily as an investment banker and private equity professional. He and his wife Wendy have been education and mental health advocates supporting various local organizations, including The Rise School of Dallas, The Lamplighter School, The Hockaday School, St. Mark’s School of Texas, The Bridge North Texas, KIPP DFW, and Teach for America. Payne has two children who attended Lamplighter: Katie Payne ’06, who currently attends Duke University, and Whit Payne ’08, who attends St. Mark’s School of Texas; he also has three stepchildren, Blake, Margot, and Michael Poston.
Brenna Lambert,
LPA President
A native of Sioux City, Iowa, Brenna Lambert moved to Dallas in 2000 to work for JCPenney in Plano, after receiving a B.A. in Mass Communications from Northeastern State University in Oklahoma. She began her work at JCPenney in the catalog print area, and then moved over to the digital side to help transition catalog print to jcp.com, ultimately becoming a digital specialist in the national advertising department. Lambert left JCPenney to raise her children and pursue other business interests. She currently runs Brenna Lambert Designs, a jewelry business in which she designs and creates exclusive, hand-crafted jewelry and custom resin photo jewelry. At Lamplighter, Lambert has volunteered in various positions including room parent, Auction Committee member, Carnival Chair, and most recently, President-Elect. Lambert and her husband Will have three children, all of whom attend Lamplighter: Gavin (9) in fourth grade, Gage (6) in first grade, and Brielle (5) in Pre-K.

Katherine Rochelle Wyker, Alumni Council President
Katherine Rochelle Wyker is excited to begin this school year as the President of the Alumni Council. As a graduate of Lamplighter, she went on to attend St. Andrew’s Episcopal School of Austin. She has served as a class agent since 2012. Rochelle Wyker holds a B.A. in Art History and Religion from the University of Mississippi. She is the director of the MARC Foundation which has several focuses including community art and education programs for children. Rochelle Wyker and her husband Austin have a puppy named Barnabus.

The Lamplighter Board of Trustees has appointed Jennifer Mosle as a Life Trustee. The main qualification for a Life Trustee includes demonstrable and meritorious service to the school. “I was honored to be asked,” Mosle said. “Lamplighter holds a special place in my heart, so I look forward to remaining connected to this wonderful institution (until my death do us part...).”

Her relationship with the school first began as a parent when her two children (Kate ’04 and Michael ’08) attended, and Mosle quickly became involved. In her 12-year tenure on the Board of Trustees starting in 2000, Mosle served on the committees for Advancement, Campaign Steering, Strategic Initiatives, and Core Campaign Initiatives.

Mosle’s leadership as chair of a number of important committees has also set her apart. During the four-year campaign to secure the ownership of the campus, Mosle proved “instrumental” throughout the entirety of the process as the Chair of the Land Acquisition Committee, said Sarah Weinberg, current 2016-2017 Board of Trustees Chair.

Mosle’s involvement has also included a number of other notable achievements, such as revising the inclusion statement as Chair of the Diversity Committee and helping to lead the Endowment Initiative from 2006 to 2008 and the Campaign for the Future from 2010 to 2012.

In 2010 she was honored with the 2010 Lamplighter Spirit Award for her contributions, and this recognition assures her continued and highly valued presence at the school.

In recent years, Mosle has worked at Lamplighter as a member of the Strategic Initiatives Committee, and just this last April, she and her husband Jon pledged a generous gift to the School’s Capital Campaign to Fund People, Place, and Programs. Her involvement and support will continue to be felt as Lamplighter heads into an exciting era with the addition of a leading-edge Innovation Lab and newly designed and constructed barn.

Outside of the Lamplighter community, Mosle has served several institutions including The Hockaday School, Educational First Steps, Dallas CASA, and Southwest Medical Foundation.

Mosle cites the school itself as inspiration for her service. “I believe in Lamplighter’s mission and admire its culture,” she remarked, and added, “I will strive to be an excellent ambassador for Lamplighter.”
“Lamplighter’s ‘ubiquitous barn’ has been a source of learning and joy for more than sixty years,” recalls former teacher Sheila McCartor, who said she believes that “despite the varied forms in different locations, it has always been a center of education, excitement, and great enthusiasm.”

Lamplighter’s new barn opens this fall and “promises to be better than ever,” said Dr. Joan Hill, Lamplighter Head of School, who noted that Lamplighter had not expanded its campus in more than 20 years. “There is so much excitement within the Lamplighter community,” according to Dr. Hill, who said the plan includes not only the new barn but also the nearby Innovation Lab, currently under construction.

The new construction is a result of the 2012-17 Lamplighter Strategic Plan that included a fundraising initiative entitled, “A Campaign to Fund People, Place, and Programs: Igniting Young Minds for a Lifetime of Learning.” Using the Strategic Plan as a guidepost, the School’s Trustees considered the students and their needs now and into the future. “Our students are the centerpiece of all plans and provided the inspiration and motivation for the ongoing campaign,” said Dr. Hill, who explained that “the Campaign has allowed us to build the new spaces necessary to extend and improve upon the work that is currently taking place at Lamplighter.”

Because land was needed to build the Innovation Lab, the original barn was dismantled last spring and replaced and enhanced with the unique and dynamic design. A new fenced-in area for the animals and rebuilt chicken coop provide a new and improved home for the 47-year-old Lamplighter Layers program, the School’s signature entrepreneurial chicken-raising and egg-selling corporation managed by the School’s Seniors. Or as Lamplighter alum and current parent Shannon Morse called it, “The special domain of fourth graders going about the serious business of running a growing concern as we tended to our profit center, the chickens!”

While the ‘I-Lab’ will feature a teaching kitchen, an environmental science classroom, a robotics lab, and a woodworking classroom, the 1,625 square foot barn, rebuilt in a modern style compatible with the I-Lab, will also provide ample gathering space for parents, faculty, and administrators. The gambrel-style structure will accommodate up to 45 chickens and will include an area for egg processing, refrigeration, a computer station, as well as an area for recording data, and loft for storage space. The chicken coop is located on the southwest side of the campus, with an adjacent animal pen. To keep with tradition, the barn silhouette was designed “to continue to be the recognizable symbol on campus,” according to architect Marlon Blackwell. Assistant Head for Academics Vicki Raney says it will be “the classic red barn color to ensure that the building will still feel like a real barn in the sense that it will have a better environment for the animals and the chickens will still have a home.”

Blackwell reiterated that the new construction “will feel very Lamplighter because we are paying close attention to what is there already, such as the quality of light in the spaces, the warmth of materials, and the inside-outside
relationships, i.e., the porches.” He described the barn as having its own identity. “It’s very unique… the new structures respond to the geometries of the existing buildings, not just square boxes.” The firm’s project manager, Bradford Payne, said he believes “Lamplighter’s vision for students, the barn, and the curriculum is incredible,” and added, “I think that really informed a lot of the decisions we made.”

Raney emphasized that the barn will have meeting spaces but no classrooms, “meaning that other teachers outside of the environmental science program can also use it.” For example, she explained, “students could do creative writing about nature or even use the space to conduct research for a math class.”

Consistent with the Innovation Lab, she explained that the barn will continue with the theme of ‘making and doing’ in order to learn kinetically rather than just being sedentary. “That requires more space.”

Dr. Hill mentioned that with the new barn’s extra space, it will also be available for events such as Parent Perks and groups including the Lamplighter Parents’ Association. “So every member of the community will have access, not just faculty and students… everyone will get to experience it.”

Both new buildings will continue with the theme of design specifically fit for small children. “Not only did they think about third and fourth graders, but the builders have also considered how three- and four-year-olds might use the spaces,” remarked Early Childhood Director Judith Mullens. Dr. Hill agreed and added that along with the open-air aspect of the classrooms, “The new construction is consistent with the existing buildings on campus.”
Dr. Joan Hill, Lamplighter Head of School, believes the future of innovation in schools rests with strong partnerships with universities, museums, and foundations, “as this is where much of the new thinking is initiated.” She said the partnerships that Lamplighter continues to build, including the Dallas Arboretum, the Perot Museum, and SMU, “strengthen our curriculum and community in multiple ways.”

Recognizing that the Lamplighter partnership with SMU is important to the School’s work, Dr. Hill believes the opening faculty meeting with Dr. Rob Rouse and Professor Katie Krummeck “gave us an opportunity, as a community of learners, to stretch beyond our comfort levels to learn about human-centered design.”

Krummeck recently joined SMU from the ‘d.School’ at Stanford University. Rouse, who focuses his teaching and research efforts on how to design innovative STEM learning environments, looks at the intersection of science and engineering by investigating how design-based learning environments engage students.

Through the associations, Dr. Hill submits that Lamplighter students have greater opportunities for hands-on learning which is emblematic of the Lamplighter experience. “Our partnerships ensure that Lamplighter is offering the very best instructional practices as we instill a love of learning.”

One of these thriving strategic partnerships with SMU, was forged in 2012. In August, Lamplighter faculty and staff engaged with two visionaries from the university in the field of design thinking and maker models of learning. Krummeck, Director of the Deason Innovation Gym (DIG) program at the Lyle School of Engineering, and Rouse, Clinical Assistant Professor with the Annette Caldwell Simmons School of Education and Human Development, are consulting with teams of Lamplighter faculty throughout the year.
According to Dr. Hill, Krummeck and Rouse are helping faculty explore and define what the concepts of design thinking and making mean for Lamplighter. Krummeck describes maker-based education as not just about STEM; rather, “it is a pedagogical approach that supports cognitive, affective, and psycho-motor learning objectives—an approach to teaching and learning that is open-ended, challenge-based, and relevant to the real world. When students ‘make,’ they are intrinsically motivated, engaged in their learning, have to face open-ended ambiguous problems, and actively work to solve them.”

In August, during a workshop at Lamplighter with faculty and staff held the week before school started, Krummeck and Rouse engaged the group in “hands-on making and innovative thinking.” Their goal was to “design a set of experiences meant to inspire and equip the teachers with methods and support for integrating maker-based activities into their own classrooms during this coming school year.”

Becky Walker, a third grade teacher at Lamplighter, said she “was eager to work” with the two, “as we move our focus on maker spaces and design into a more formalized curriculum.” Fourth grade teacher Jody Stout agreed. “Krummeck and Rouse bring unique insight and inspiration to the notion of what the maker movement is.”

The experiences that the two created focused on developing teachers’ skills around prototyping and 3D modeling as well as exposing teachers to their approach to pedagogical and instructional design. Olivia Claiborn, a first grade teacher, was also inspired. “The STEM and design thinking programs address different learning modalities and styles. It’s not about just those students who are really into coding or Legos®, but it also gives kids who excel at art and collaboration a place to shine.”

In addition to hosting the workshop, Assistant Head for Academics Vicki Raney and Director of Early Childhood Judith Mullens arranged for faculty to spend a second day together that week on the campus of SMU. The group visited the DIG and the Simmons School’s Maker Lab. Described as a facility that combines a design studio, a machine shop, and a garage that features 3-D printers and a laser cutter, the DIG is 1,200 square feet dedicated to undergraduate design projects. According to Krummeck, the DIG was built to “change engineering education. Research shows that hands-on learning is far more effective than the traditional classroom setting,” she continued.

Recounting the DIG experience, Raney said, “It was exciting to see 50 teachers learning and experimenting with TinkerCAD, a new computer-assisted drawing program.” She said the experience started with faculty being “stumped and unsure,” transitioned to teachers feeling “energized and challenged,” and in the end, faculty all appeared “accomplished.”

“Their work in the SMU classroom looked just like the work done by students in the Lamplighter classrooms!” she smiled.

About the two days spent together that week, Rouse commented that the Lamplighter faculty and staff “did not disappoint. Everyone was enthusiastic and willing to think about instruction in a new and innovative way. They showed up ready to work and showcase their creativity.” Mullens agreed and said the teachers “enjoyed exploring the human-centered design process, as they problem-solved, collaborated, drew 3D images, and built models of their innovative solutions to current challenges.” Third grade teacher Lauren Hardage mentioned that she looks forward to learning more about “how we can apply this tinkering and making movement to young children.”
Later Raney revealed that “it was so meaningful for our faculty to collaborate on a programming/design project that was guided by a university professor and director of a special engineering program. Lamplighter faculty members are the perfect models for being ‘Lifelong Learners.’”

Raney said she was excited when Krummeck and Rouse presented bits of background information “in a mini-lessons format, worked alongside us as we experimented with TinkerCAD, and then challenged us with a project that we could do with a partner.” She described this instructional model “as a match for how we teach at Lamplighter, and it will serve us well when we introduce STEM and design challenges this year.”

Both Krummeck and Rouse observed that not only did the teachers “make real progress in their technical abilities, we also had robust conversations about our pedagogical approach and how teachers might integrate this way of teaching and learning into their classrooms.”

Afterward, Raney discussed the future of the partnership. “Katie Krummeck will visit with us throughout the year.” In addition, Krummeck will work with a ‘maker’ cohort of teachers who will meet with her for more personalized learning and coaching.

Krummeck said she believes this indicates that Lamplighter “is well positioned to implement high-quality, maker-based education.” Teacher Stout agreed and added, “We are very fortunate to be able to partner with SMU as we explore the creative and curricular possibilities that our new Innovation Lab (opening Spring 2017) will allow.” The ‘I-Lab’ will feature a teaching kitchen, an environmental science classroom, a robotics lab, and a woodworking classroom.

New to Lamplighter’s first grade teaching team, alum Savannah Seifert described the SMU visit as “Priceless – being able to explore in the DIG and to see all of the tools they provide for their students got me thinking of ways to provide the same useful tools but on an elementary level,” said Seifert, who added, “Now I am even more excited for what is to come with Lamplighter’s Innovation Lab.”

“Given that taking on a new approach to teaching and learning can take time and practice, Krummeck said she and Rouse were ‘thrilled that we will be able to continue to work with Lamplighter over an extended period.’ Explaining the plans, she said they “will aim to help the School unpack and make sense of their experiences as they design and teach new lessons, iterate on past lessons, and work more broadly toward integrating maker-based learning experiences into their classroom instruction.”

“Lamplighter faculty members are the perfect model for being ‘Lifelong Learners.’”

Later Dr. Hill remarked that the work planned for the new Innovation Lab “will be even more meaningful for our students as we move the curriculum further into Project-Based Learning.” Citing the many problems that need to be solved in our world, Dr. Hill believes Lamplighter students are learning to think broadly and to be open to myriad possibilities. “We continue to be the school that supports and celebrates innovative thinking.”

Describing the culture of Lamplighter as ‘phenomenal,” both Krummeck and Rouse said Lamplighter is “truly a student-centered school with caring, thoughtful teachers.” They said they were “excited to help take the already excellent learning culture at Lamplighter to the next level by integrating maker-based learning experiences into the core school model.”
Beginning in the 1950s, Lamplighter’s founders developed a campus, a curriculum, and a community that focused on giving students a strong foundation in the fundamental and high-flying opportunities for creativity – “a serious education wrapped in the wonder of childhood.”

According to former teacher McCartor, the School’s founders ‘were eager to provide ‘city children’ with opportunities to observe and care for the great variety of animals that have inhabited the barn and its surrounds.’

**“VENERABLE, SPLENDID LAMPLIGHTER!”**

Former Head of School Pat Mattingly described Lamplighter’s original Churchill campus as “having chickens from day one. It was more farm-like… and out in the country.” She added that because of the atmosphere with the chickens and, at the time, the peacocks, “the whole idea was, how can we make it like that but in a new location to keep the integrity?”

She defined the barn as the School’s “real showplace. People were always asking ‘what’s happening in the barn?’” She said that initially, the barn “was just for fun like a playground” and not used for classes, and added, “Students would ‘chill out’ there.” She defined it as “a fun place… not educational, an escape.”

Mattingly clarified that the original barn on the current campus was used similarly at first, and later, it became the home for the fourth graders’ Lamplighter Layers program. “The children’s memories were wonderful because they loved being out there with Layers.”

Once one of those children, and now a parent, Morse said she feels like “the old barn was always there; a stalwart backdrop to the animals in the barnyard and our own play on the playgrounds.” Environmental Science teacher Linda Cauley agreed. “The barn ‘playground’ included jumping in the hay and climbing the rope to the ceiling.”

With her new position at Lamplighter in 1974, Mattingly thought she “would be doing all of these educational changes for the new century,” but in her first day in the office, “somebody said, ‘Do you want Kentucky blue grass or winter rye on the grounds?’ and I thought ‘Okay, I’m running a farm now!’”

With the news last year that the original barn was being dismantled, Mattingly said she recalls being told “Don’t faint!” She originally thought, “Oh, no,” because she could not imagine a new barn. “But I was relieved to find out that a new and improved one was coming in its place.”

Fourth grade teacher Kathey Beddow said she is “greatly looking forward” to the new home for Layers and expressed her appreciation for the temporary coop.

“Layers and the barn provide the most unique and amazing opportunity for children to work together, learn about nature, and be responsible for the care of creatures that are dependent on them.”

The barn has housed each senior class’ “unique and special flock of chickens,” the focus of Layers for decades, Beddow continued. “The barn has kept the fourth graders and chickens safe, dry, and warm, while the students have worked together to take the best care of the chickens and the eggs,” said Beddow, who added, “Our dear barn has been filled with joy, amazement, hours of learning and laughter, and opportunities that are unique to Layers. And there is nothing better than hearing squeals of joy when the first egg of the year is discovered!”

Cauley also expressed anticipation about the new barn “because the chickens will have a new permanent home.” She described the new prep and egg storage station “that will make the job of feeding the chickens and filling the watering cans much more efficient learning.” McCartor asserted, and added, “But very soon, a glorious new barn will assume the duties and responsibilities of its forebears.”

Venerable, splendid Lamplighter!”

Morse continued, “As a parent, I am excited to see the unique traditions of Lamplighter continue for current and future students with the ‘Barn 2.0!’” Beddow agreed and said she and the fourth grade team “are looking forward to all the new learning experiences and opportunities that our new barn will provide.”

“How fortunate our Lamplighters are, that through the decades, this wonderfully unique experience continues to be a source of hands on
In this continuing section, LampPost illustrates the ways our accomplished faculty members teach, engage, inspire, and mentor as they deliver serious education wrapped in the wonder of childhood. Learn more about our published authors, Mattingly Award winners, world travelers, and our “lifelong learners” who are earning advanced degrees and professional development certificates.
Since then, I’ve gone to several workshops and have tried to learn as much as I could about the craft of writing. Several of my professional articles have been published in academic journals. Plus, I’ve had one small contribution to Highlights for Children.

Learning to write effectively takes time. Each of these publications has been practice to fulfill a dream I’ve had for a long time – to publish a longer work of fiction in the children’s market.

Around December 2014, the beginning of a story idea came to mind for a young adult novel. Ideas come and go, but this one stuck. It got wedged enough in the creative nooks of my mind that I wrote out a basic description of the story. Something that might be found on the jacket cover of a book. Still, the idea stuck around. I shared the concept with a few writer friends and an editor I had met from Simon and Schuster. All of them enthusiastically encouraged me to write the story. So I did.

Fast forward to late 2015. A writer friend had been reading chapters as I was writing them. She encouraged me to take the completed work to a Whole Novel Workshop at Highlights.

The Mattingly Fund came to mind. After the application process, I was very fortunate to be selected. Then, it was a rush to get my manuscript completed before the Highlights submission deadline.

At the Highlights Foundation retreat center, I attended a weeklong Whole Novel Workshop. The faculty at this workshop was simply amazing. The one-on-one reading and discussion sessions with my faculty mentor opened my eyes to potential changes in my next revision. The evening presentations from the faculty gave me insights into the craft of writing. And there was plenty of time to write or simply be inspired by the natural setting.

As of this writing, my novel is still in revision. But thanks to Pat Mattingly and the Highlights Foundation, I’ve got new energy, new ideas, and new tools to get the story polished and ready for submission to the publishing industry.
This past May, I had the privilege of traveling to Florence, Italy, capital of the Tuscany region, to engage in a printmaking workshop through the Mattingly Award. Working alongside artists from San Antonio to Dubai, we shared a common desire to make art, uninterrupted, in a city known for its culture and its artistic and architectural heritage.

A small, cozy apartment in a quiet neighborhood became my home for two weeks. It was located a few blocks from the art studio and near the city’s center that is dominated by the enormous presence of the Florence Cathedral, the Duomo. The Cathedral’s dome quickly became my compass in this compact little city.

**Art is my great passion. Making art is a lifelong endeavor.**

Each day began at Rosano Caffe for my morning espresso. It was a blissful place where I would sketch ideas and contemplate the day that lay ahead. The locals chattered on in Italian, and birds sang through the open windows. A short jaunt away was The Reparata International School of Art. It was here that master printmaker Ron Pokrasso would start our mornings by demonstrating a technique or approach, followed by dialogue. No further stimulation was needed to continue my adventure with ink, paper, collage, drawing, and anything else that seemed just right for that moment.

Throughout my stay in Italy, I experimented with new approaches and delved deeper into familiar ways of working. Walks through the city were absolutely inspiring and often influenced my work. My camera worked overtime capturing ancient art juxtaposed with the modern world, an endless variety of patterns, and textures found on the narrow cobblestone streets. I had time to reflect on my journey as an artist; what had I done so far, what was I currently exploring, and in what direction I was headed. I’m often surprised by what I think I’m going to experience and what actually happens.

The opportunity to spend two whole weeks in an ancient city, submerged in creative pursuits, has thoroughly enriched my life. I loved going to museums, indulging in gelato, and breathing in the essence of the Florentine culture. Being awarded the gift of time to be creative in a stimulating atmosphere is the dream of most artists. It certainly was one of my most meaningful life experiences.
In July, faculty members Maggie Fulton, Jessica Varela, Katie Nelson, Kate Ogden, and Bryce Sizemore attended the Tots & Technology conference in Frisco. The annual event is hosted by the Texas Computer Education Association (TCEA). “TCEA is well known in the education field for their work in supporting technology education and use in elementary classrooms,” explained Sizemore.

Ogden and Sizemore presented “A Smashing PBL,” a learning session focused on creating learning opportunities for various learning styles through the use of multilayered connections to create deeper, more rewarding learning experiences. “We were honored to have the opportunity to share the Lamplighter way with educators from across the state of Texas,” Sizemore shared. Highlights included how to utilize books, virtual field trips, real-world experiences, photographs, and teacher selected internet articles to engage young students in effectively gathering research about their topics. Ogden and Sizemore shared. Highlights included how to utilize books, virtual field trips, real-world experiences, photographs, and teacher selected internet articles to engage young students in effectively gathering research about their topics. Ogden and Sizemore shared. Highlights included how to utilize books, virtual field trips, real-world experiences, photographs, and teacher selected internet articles to engage young students in effectively gathering research about their topics. Ogden and Sizemore shared. Highlights included how to utilize books, virtual field trips, real-world experiences, photographs, and teacher selected internet articles to engage young students in effectively gathering research about their topics.

Later Ogden and Nelson presented “Coding with Pre-Readers? Yes, You Should!” In this presentation, the two discussed why providing opportunities for students to build problem-solving skills is critically important in this day and age. “Coding encourages students to begin developing the skills necessary for problem solving, and young pre-readers are just as capable as older students when it comes to building that foundation,” explained Nelson. In addition to fostering computational thinking, teaching coding to younger students can also effectively enhance math, storytelling, and literacy development. Not only that, but it’s engaging and fun for the students! “We discussed successfully creating a coding program extending from Pre-K3 to fourth graders by fostering coding in our youngest students,” added Ogden.

Fulton presented “Blogging in the Elementary School Classroom” with her twin sister, Melissa McNally, a first-grade teacher at Greenhill School. In this session, teachers learned how to set up, manage, and run a successful classroom blog. Participants used the program SeeSaw to set up a blog and received helpful start-up materials including a hype letter to send to parents, a letter to their administration, and blogging tips and management techniques. Teachers also received information on how to use a blog for cross-curricular studies and a variety of ways to use blogs to have meaningful communication between student-teacher, student-student, and student-parent. Fulton said participants left “feeling confident and excited about starting this fun practice” in their classrooms.

When the Lamplighter faculty members were not presenting, they enjoyed learning during many sessions focused on specific ways to integrate age-appropriate technology education in the classroom. “Being able to collaborate with other Lamplighter colleagues during the conference was a great bonus to all of the information we were learning,” exclaimed Varela, who added, “We are all very excited to try out various new technologies in our classrooms this year.”
Farm to Market
Practicing skills from science, math, literacy, and social-emotional curriculum
Pre-K students hold third Farmers’ Market
by Cara Hicks and Rachel Schumann

Last May, Lamplighter Pre-K students were excited to open their Farmers’ Market. Tables were set and draped in checkered tablecloths, with toy cash registers all in a row. Handwritten signs of merchandise with prices, proudly decorated bags for purchased goods, and baskets of fresh vegetables ready to sell awaited eager customers.

Many handmade items were also available for guests to purchase: bird feeders, garden markers, popsicles, pinch pots, and tiny herb gardens, all proudly displayed. The smell of fresh-popped popcorn filled the air along with the excitement of so many young learners. With sunny blue skies, aprons tied, and huge smiles on their faces, the day had finally come to open their market. Lamplighter’s youngest tended the registers, bagged items, and handed out lemonade as a thank you to paying customers. Sounds of joy echoed on the playground as students sold their goods. This allowed opportunities for the students to write using the letters and sounds they have been taught.

As guests arrived and shopped, the children had the opportunity to enhance their social-emotional skills and practice good customer service. When the market ended, their “profit” was donated to the North Texas Food Bank. Lamplighter’s Pre-K students were able to proudly present a representative from the food bank with a $60 donation this past year!

The crops they sold were grown in the garden beds built by a former Lamplighter Boy Scout, the new keyhole garden, and even an indoor Tower Garden (see related Arboretum story by Gretchen Pollom). Pre-K students worked all school year tending to their gardens. From preparing the soil to planting seeds and seeing the first sprouts pop up, all the way to harvest, the children were engaged and fully immersed in learning! Some students enjoyed watering while others wanted to get their hands dirty and dig in the soil. Students had hands-on, experiential learning at their fingertips and a chance to make learning connections in very personal and real ways. Potatoes, onions, leeks, beets, greens, lettuces, and even a few carrots were all nurtured and grown by our young gardeners and entrepreneurs.

We are looking forward to Lamplighter’s fourth annual Farmers’ Market in 2017. Our youngest students will start working in the gardens and planting seeds this fall for a spring harvest. As you travel the Ring Road during carpool, be sure to check out our raised beds and note their progress. You might even see an eager child engrossed in learning and making lifelong memories!

The Pre-K Farmers’ Market is a project-based learning unit that gives students a chance to practice skills from the science, math, literacy, and social-emotional curriculum they have been exploring throughout the year. Children at this age are just beginning to practice simple addition. Items sold at the market cost between one and four cents, giving students the opportunity to exercise their addition skills while adding together items of a sale. Phonetically spelled signs made by the children advertised the items being sold. This allowed opportunities for the students to write using the letters and sounds they have been taught.

Crunch Time!
First graders learn about STEM through national competition
by Brandy Dalton, Maggie Fulton, and Jessica Varala

The Pringles Challenge is a nationwide competition where students in Kindergarten through grade 12 design a package that will allow a Pringle’s chip to be mailed in one piece to a partner school. The challenge was a culmination of the engineering principles and STEM knowledge that Lamplighter first graders learned in “STEM Fridays” last year. And guess what? One of our teams placed first! Our focus was to create the smallest possible container that would keep the chip from crumbling. Lamplighter was partnered with Picadome Elementary School in Lexington, Kentucky. The partner schools were responsible for scoring the Pringles chips as they arrived via United States Postal Service.

Our students were prepared and excited to create their Pringle-protecting creations. At STEM Fridays, students spent the early part of the semester learning the properties and uses of materials such as paper, plastic, wood, cardboard, and other recyclables through Makerspace activities. Students worked in groups of four to design a container and draw out a prototype of their ideas. Then, they used the supplies from our Makerspace to create their packaging. The students loved throwing them around the room to check how secure the packages were!

Our packages varied from tissue boxes filled with bubble wrap, an egg carton and toothpicks, Gatorade bottles and tissue...
paper, and much more. When our Pringles chips arrived in Kentucky, our partner school scored our packages using mass, volume, and the intactness of a chip. Our packages received high scores for a small mass and volume and a perfectly intact chip.

When the scores were revealed, Lamplighter first graders were thrilled to learn that of the more than 800 teams that participated in the Pringles Challenge, one of our teams placed first!

Other interesting commentary we received were “clever packaging!” “Nice design and easy to open,” and “Great design!” Our students were thrilled to have such a fun and authentic exploration of their STEM knowledge.

**FUN FACT:**
A Pringles chip is a hyperbolic paraboloid: An infinite surface in three dimensions with hyperbolic and parabolic cross-sections. A couple of ways to parameterize it and write an equation are as follows: \( z = x^2 - y^2 \) or \( x = \sqrt{y^2 + z^2} \).

**+Numbers Game—**
Enhanced math curriculum includes literacy, vocabulary connections, online resources by Leslie Bledsoe and Maggie Fulton

For two days in June, the Lower School math teachers met for training on the new Everyday Math curriculum. After months of research, visiting with local private schools, and listening to presentations from math reps, it was determined that continuing with Everyday Math curriculum was the “best fit” for Lamplighter students.

At the training, we were introduced to the online components of the program which include literacy and vocabulary connections, online resources that can be accessed from home, new and improved games, and features that will enhance our math experience and improve options for the children.

One of the aspects of the new adoption that faculty is most excited about is “home access.” Each student will have a personalized log-in which can be used to access Everyday Math from a computer or iPad. There are many components to the program with which parents will want to become familiar. Each student will be able to access the following:

**Student Reference Book:** A digital copy of the book that is used at school. It serves as a resource for concepts and vocabulary at each grade level.

**e-Toolkit:** Includes 2 and 3D shape libraries, card decks, base-10 blocks, clock models, fact triangles, geo-boards, fractions circles and models, money, pattern blocks, and many other features.

**Geo-meters Sketch Pad:** Provides extra practice on specific math concepts

**Tutorial Videos:** Children can watch a video to receive additional exposure to a topic that has been covered in class. This will be especially helpful for a child who may have missed school and that day’s instruction.

**EM Games Online:** Includes many games that correlate with each grade level’s curriculum. Within each set of games, there are skill-builder levels and challenge games. These are one- and two-player games; for two-player games, a student must be in the same room as his or her opponent.

**Assignments:** Each day’s lesson will be available electronically through a computer or an iPad. If a child is absent, he or she may still do that day’s classwork using an electronic device.

The Lower School faculty is looking forward to implementing this program this fall and continuing our collaborations with one another to ensure that we are maximizing the features this updated math adoption provides.

**Author Elevated**
Media Center Coordinator Elected to Texas Library Association’s Round Table
**by Patricia Vermillion**

Patricia Vermillion, Lamplighter’s Media Center Coordinator, and well-known children’s book author, has been elected as Counselor with the Texas Library Association Authors and Illustrators Round Table. The goal of the group is to assist authors in getting to know their Texas librarians and to let Texas librarians know about the wealth of authors and illustrators in the state of Texas.

The Round Table is the brainchild of Mr. Pat Anderson, a Texas bookseller and owner of Overlooked Books in Killeen, Texas. He often organized informal author and librarian Meet and Greets at the annual spring TLA Conference and encouraged attendees to become an organized Round Table. After officers were elected, Susan Kralovansky, Chair; Jessica Lee Anderson, Chair Elect; Patricia Vermillion, Counselor; Amy Louthan, Counselor Alternate; and Christi Diggens, Secretary/Treasurer; the Round Table began work to meet the needs of authors, illustrators and librarians.

Vermillion said she was “honored to represent The Lamplighter School” as Counselor of the Texas Author and Illustrators Round Table. “I will be assisting the president, Susie Kralovansky, with three programs for the Texas Library Association: What’s New with Picture Book Authors, What’s New with Middle Grade & Young Adult Authors, and Author Visits Helping Students with Reading and Writing.”
In July, Lamplighter faculty members Bryce Sizemore, Jody Stout, and Jessica Varela were honored to participate in the K-12 Design Thinking for Educators Workshop presented by Stanford University’s Hasso Plattner Institute for Design (d.School) in partnership with Good Shepherd Episcopal School.

Lamplighter’s mission has long embodied the understanding that when children are not afraid of failure, they stand upon a springboard for learning and growing. The d.School’s strategic steps for the practice of risk-taking, failure, and reassessment provide active and engaging strategies that practice these daring skills, providing a foundation for creative confidence.

As promised, the d.School facilitators had planned something unique for the group of about 60 educators from various schools across Texas. From day one, teachers were immersed in the process of Stanford d.School’s Design Thinking—a framework for prompting innovation, cultivating creative solutions, building empathy, and promoting rapid prototyping.

“As throughout the three-day conference, we were led through a series of five design challenges,” explained Varela. “We walked through each step of the Design Thinking process: develop empathy, define, ideate, prototype, and test. We were eager and ready to take notes, but notetaking was not what the d.School had in mind.”

Following a quick rehearsal of each of the steps, Lamplighter teachers were paired with colleagues from other schools. The workshop participants were loaded onto a bus and sent out into the Dallas community. Some participants visited a local chapter of the Boys and Girls Club, while others visited Richland Community College, and still others visited NorthPark Center.

As a teacher, I really connected with this very human-based approach to thinking and working.

The first step, develop empathy, was practiced hands-on and in real time. “As a teacher, I really connected with this very human-based approach to thinking and working,” stated Stout. “What better way to help children value their own productivity than to provide opportunities to grow their ideas from a sense of purpose, dedicated to real-world solutions.” Sizemore added, “Being pushed out of my comfort zone during this process helped to create a complete picture of the Design Thinking process, and it helped me to understand exactly what we are asking our students to embrace.”

At the close of the intensive three-day workshop, Sizemore, Stout, and Varela left bubbling with inspired ideas for the classroom and new tools for lighting lamps.

Krummeck described how the DIG staff and several members of the student team ran demos of their 3D printer and laser cutter, answered questions about engineering, and facilitated a hands-on workshop. Students brainstormed and invented new creatures during the workshop, and engineered connections between a simple motor and battery “to make their creatures scurry across the table.”

To complete the project, the students were asked to devise a way to build a complete circuit with an on-off switch and attach the circuit to the “spine” of their “creature” to create maximum movement. “By allowing students to tinker, experiment, and learn their way to different solutions, we are helping them to build confidence in their creative and problem-solving abilities,” explained Krummeck. “Whether you are a college
Family Affair

Five faculty members’ children attend FunCamp together

This past summer, for the first time, the children of five faculty members all attended Lamplighter’s FunCamp together. Adair Burdick, Briggs Schumann, Gigi Nelson, Sloan Landry, and Abigail Bays, the children of Pre-K teachers Sarah Burdick, Rachel Schumann, and Katie Nelson; reading specialist June Landry and Pre-K teacher Carrie Bays were all together at Lamplighter in June.

Now the school year is well underway, and all of the Early Childhood students are enjoying Pre-K. “There is no place I would rather have my daughter spend her early childhood years,” said Bays, who added, “When you’re so passionate about a place, and then you see your daughter get to live it, it makes it all worth it!”

L-R: Sarah and Adair Burdick, Rachel, Berkley (Lamplighter second grader) and Briggs Schumann, Katie and Gigi Nelson, June and Sloan Landry, and Carrie and Abigail Bays.
Jordin Nelson
Alternate Teacher
Nelson is a Kansas City native (Go Royals!) who moved to Dallas to join Lamplighter. She received a Bachelor’s degree in liberal arts and a minor in mathematics from the University of Missouri – Kansas City. Nelson has taught first and fourth grade in Missouri public schools and serves as an alternate teacher while she begins her Master’s program. She enjoys creating Pinterest crafts and DIY projects in her free time. Nelson also loves to visit her family’s ranch in East Texas on long weekends.

Savannah Seifert
First Grade Teacher
Seifert joined the first grade teaching team after serving as a student teacher in Lamplighter’s first grade last fall and finishing the year as an alternate teacher. She graduated with a Bachelor’s degree from SMU, and this past summer, studied reading instruction and the workshop approach with Lucy Calkins at Columbia Teachers College in New York City. Seifert and her siblings attended Lamplighter.

Caroline Finnegan
Fourth Grade Teacher
Finnegan joins Lamplighter as the new fourth grade composition and social studies teacher. She earned a Bachelor’s degree from Middlebury College in Vermont and a Master’s degree in language and literacy from Harvard. Finnegan taught six years at Grace Episcopal Day School near Washington, D.C. She and husband Tim have a son, Brady, a Lamplighter Kindergartener.

Anita Kurialacherry
Kindergarten Assistant
Kurialacherry received a Bachelor of Science degree from UT Austin in Chemistry, and a Masters of Arts in Teaching Science Education from UT Dallas. She has taught high school chemistry and physics and most recently taught at the Perot Museum of Nature and Science. Kurialacherry loves sharing her passion for science with others and is excited to work with our youngest learners who are full of natural curiosity and have a passion for learning. She comes from a big family that loves exploring the outdoors. Kurialacherry’s parents immigrated to the U.S. from India, and settled in Detroit before moving to Dallas 16 years ago. She assists Bryce Sizemore in Room 34.

Jason Anderson
Kindergarten Assistant
Anderson received a Bachelor of Science degree from UT Dallas in Psychology and Child Development. He was a Kindergarten Greenhill Fellow for the 2015-2016 academic year. Anderson’s father taught him that everything that happens around us is worth treasuring. He is fascinated with the “little things” in life, like the smell of a fresh summer rain and the shadows cast by passing clouds, and wants to show students small wonders like these that occur every second of every day. Someday, he would like to pursue a career in counseling. Anderson assists Bianca Reyna in room 32.

Lisel Simmons
Kindergarten Assistant
Simmons received her Bachelor of Science in Agricultural Development from Texas A&M at College Station, and is a graduate of The Hockaday School. While at Texas A&M, she learned how to teach children about farm-to-table healthy eating and marveled at how some children have no idea that milk comes from cows! Simmons loves animals and just got her first chicken coop. She has three children, two of whom are at Hockaday, and one who attends Parish. Simmons assists Hannah Brown in Room 33.

Former Lamplighter student Ellen Terrell hired as new school nurse
Nurse Ellen Terrell graduated with a degree in Psychology from Vanderbilt University and attended Baylor University where she received a Bachelor of Science in Nursing. Terrell previously worked with critical care patients at Clements Hospital, UT Southwestern Medical Center. While there, a friend who knew Terrell was interested in school nursing mentioned the open position at Lamplighter. Terrell lives nearby and attended Pre-K and Kindergarten at The Lamplighter School, so she was very excited to accept the position. “Everyone is so welcoming and the kids are great,” Terrell said; “I love it!” Of her time as a student, Terrell remembers fondly the barn, horse, and the wells in the classrooms and is excited to be back as the new school nurse. In Terrell’s spare time, she loves being a mom to her three teenage boys, spending time with friends, traveling, reading, renovating homes (as time permits), and shopping. Terrell lives with her husband Charlie, her sons Ryan, Charlie, and Will, her two dogs, Pebbles and Honey, and a family pet frog.
In this continuing section of LampPost, we spotlight staff members who embody the concept of “forever learners.” While they may work behind the scenes, their life experiences and diverse hobbies truly demonstrate the spirit of Lamplighter. Learn more about these valuable members of our community and their immersion in art, adventure, and volunteerism.

Accounting for the Community
Staff Accountant Shlynn Sims came to Lamplighter after learning about the school through the Center for Nonprofit Management and friends from Dallas.

Before joining Lamplighter, Sims served as an accounting intern with organizations including PwC, MGM Resorts International, Big Thought, and various arts establishments. What she enjoyed most about those jobs was learning how the various aspects of accounting applied to different industries and being submerged in many different cultures. Sims said she “loved being able to learn about Dallas through the lens of art and culture and about the peculiar details required to run a 15-property resort in one of the largest hospitality centers in the world.”

Sims has always had a passion for children and education. Before receiving her B.S. from Benedict College, Sims served as a tutor to students in the nearby Columbia, South Carolina, neighborhoods, and as a mentor to young girls in her church while in high school. Sims later received her M.B.A. and M.A. from SMU.

In her free time, she loves trying new restaurants with her husband, Wayne, visiting family in Las Vegas, traveling to new places, taking dance lessons, and learning to play softball.

Sims also serves as a mentor with Champions of Hope ministry in South Dallas where she mentors a fourth grade student, providing her with the encouragement, love, and support that is necessary for her to become a leader in whatever capacity she chooses. Sims serves as an extension to her student’s family, providing support and encouragement of educational aspirations, attending extracurricular activities, and participating in Champions of Hope sponsored events.

Handy Dan
Dan Knudsen, the Facilities Engineer, joined Lamplighter after previously working for CEC, Lamplighter’s electrical engineering company for the I-Lab and barn construction project. Knudsen was serving as the project superintendent when the Facilities Engineer job became available.

Knudsen is a trained electrician and is skilled in HVAC installation and maintenance, and after 40 years of construction with long days and weeks out in the heat and cold, he decided the Lamplighter position was a good move for him. Knudsen commented, “I love my new job and all the people. They have all made me feel so welcome and appreciated.”

Knudsen is looking forward to having more time to spend with his family this year. He and his wife Cyndi live in Honey Grove with their 16-year-old son Myles. They spend a lot of their free time traveling to watch Myles play baseball.

When not on the road, the family remains in Honey Grove maintaining their 45 acres with horses, goats, a chicken, a duck, three pigs, two dogs, and four cats. Knudsen certainly came to Lamplighter with extensive knowledge on how to maintain a barn full of animals!

Jay Crew
Jay Valentine started his career in IT four years ago working as a contractor for various companies.

He spent the last two years working in the Keller ISD Technology department. Valentine was excited to come to Lamplighter in the summer of 2016 as an experienced desk-side support technician.

Valentine commented on Lamplighter, saying, “I absolutely love it here. The staff and faculty are super friendly and have made me feel welcome since day one.” In addition, he enjoys working on technology projects with students, describing this aspect of the job an “added bonus.”

When not at work, Valentine enjoys a variety of hobbies including reading, bike riding, woodworking, gardening, drawing, and gaming with his 15-year-old son.

Valentine also loves anything in the great outdoors, and has been actively involved with the Boy Scouts of America for the past eight years with his son’s troop. He describes working the concession stands at the TCU games every year with the troop as “a highlight of the year and lot of hard work.” Next year, Valentine and his son hope to take the Philmont Trip, a 10 to 12-day hike in the four corners of New Mexico with the Boy Scouts.
Lamplighter’s annual Carnival held on September 30 was a ‘barnyard blast’ which attracted hundreds of Lamplighter students, alumni, parents, faculty, and staff. This year’s event was a “fun-filled” affair that celebrated the School’s new on-campus barn. In addition to the barnyard activities, the annual event hosted by the Lamplighter Parents’ Association, culminated with the ceremonial “Jacket Ceremony” where the school’s fourth graders, known as “seniors,” were honored with customized letterjackets during their final year at Lamplighter.

According to Carnival Co-Chair Tiffany Wilmer, the theme for this year’s Carnival, “Barnyard Blastoff, Lamplighter and Beyond” was chosen to represent “the wonderful years the children spend at Lamplighter.” She explained that since they will all eventually head in different directions, they will be equipped with the confidence and preparation needed to succeed. “There are no limits to what they can achieve,” she grinned. “Lamplighter is a school like no other!”

In keeping with the theme, the festivities started with a special “Moon Landing” that launched the Carnival. Students entered the event grounds in a “parade of grades” followed by the “Planting of Flags,” where the children placed American flags into a replica of the moon.

Along with favorite rides and midway games of years past, Wilmer said Carnival-goers also were excited to find a theme-related “digging for moon rocks” this year and a new attraction called Alien Laser Tag “that delighted both children and adults.” This “can’t miss” attraction had Carnival-goers lined up all afternoon, Wilmer reported.

There were also pony rides for the kids and a photo buttons booth for young and old, sure to result in collectors’ items. Featured amusements included an area for “pretend injured athletes,” a mock ER (emergency room) manned by parents who work in the medical profession. Inside, students were able to step into a doctor’s shoes for a more in-depth mock ER experience in mending broken bones. Another returning favorite ride was the zip line and “not one but two giant slides that doubled the sliding fun” for everyone, Wilmer noted, “both adults and children.”

Fellow Chair Dana Rumbauskas said the Lamplighter Carnival is one of her favorite events as a parent. “Watching the children enjoy every facet of the event made the hard work worth it.” She said the entire campus was buzzing with excitement all day. “But it is not just the kids – the faculty, staff, and even the parents were all just as enthusiastic,” she laughed.

Rumbauskas thanked dedicated parents and the LPA committee, “and all of the wonderful faculty and staff who worked so hard to make this year’s Carnival so special for the children…everything from the parade and planting the flags on the moon, to the ceremonial Senior Jacket Ceremony – it was a truly amazing day.” Wilmer agreed and also thanked “everyone on the Carnival committee” who dedicated long hours to make this event “such a hit” year after year.

“Carnival is one of those special events that characterizes the very best of Lamplighter, where we deliver serious education wrapped in the wonder of childhood,” remarked Dr. Joan Hill, Lamplighter Head of School. In addition to the event being a celebration of the School’s history and traditions and a beloved event for families every fall, it is also a special time for alumni to catch up with each other and with former teachers, explained Dr. Hill, who said Carnival is “not just for the students but also for the families and of course our wonderful recent graduates.”

Through the afternoon, children jumped in the inflatable bounce house, slid down giant slides, rode the train, had their faces painted, and scaled a towering climbing wall. “I thought the LPA knocked it out of the park with Carnival this year,” remarked parent Lisa Kirby, who added, “Everything was so organized and the event ran so smoothly. We had a blast,”
she chuckled, “No pun intended!” Teacher Brandy Dalton agreed and added that on the week following the event, “The children were still beaming with joy as they wrote in their journals about their fabulous experiences” that day.

Dr. Hill noted that the community “had much to celebrate.” She explained how the Carnival theme also revolved around the new barn-raising and imminent return of the School’s farm animals. She clarified that the original barn was dismantled last Spring and replaced and enhanced with the unique and dynamic design. She then described how a new fenced-in area for the animals and rebuilt chicken coop will provide a new and improved home for the 47-year-old Lamplighter Layers program. “This is our signature entrepreneurial ‘chicken-raising and egg-selling’ corporation managed by the School’s Seniors.”

As in the past, the day culminated with the traditional Senior Jacket Ceremony. The Seniors were awarded red and black letter jackets that they proudly wear regardless of temperature. “The senior class parents enjoyed the Jacket Ceremony on the hill again this year,” smiled Dr. Hill, who added, “This has become a new Lamplighter tradition!” The hill near the playground on campus is a raised area where a gazebo is located. “The raised elevation allowed all to see the exciting goings-on of the cherished Jacket Ceremony!” Assistant Head for Academics, Vicki Raney, concurred. “Members of our fourth grade class proudly received their letter jackets on the hill…It’s certainly a memory and keepsake for the ages,” she smiled.

Afterward Dr. Hill said the atmosphere didn’t just feel like a school Carnival. “It had the warmth of a long-awaited family reunion.” She thanked the parent volunteers and LPA President Brenna Lambert and the Carnival Co-Chairs for their hours of dedication. “The entire event could not have been more perfect.” She said she believes the time and energy that go into planning Carnival will continue to distinguish the School. “Our campus was literally transformed into a fun space-themed celebration of our tradition, new barn, and community…We were all a part of the ‘Blast’ and loved every moment of it.”
Seth Applebaum ’08 graduated with high honors from Parish Episcopal School where he was on the basketball and tennis teams and served as an ambassador. He was also a member of the national honor society for Spanish and Mu Alpha Theta.

Meika Bass ’08 graduated from The Episcopal School of Dallas where she was the captain of the varsity field hockey team, played junior varsity soccer, and junior varsity volleyball. Meika was inducted into the National Honor Society and was awarded the President’s Student Service Award, as well as receiving Honor Roll in 11th and 12th grades.

Shelby Brand ’08 attended the Shelton School where she received the Award of Excellence Hall of Fame and Outstanding Junior Award. She was a member of the Student Council, Shelton Delegates, VNA Teen Board and JSB Teen Committee. She was a member of the Chargerette Dance Team and was inducted into the National Honor Society.

Sloane Castleman ’08 graduated from The Hockaday School where she played varsity field hockey, varsity soccer, and varsity lacrosse. She volunteered at the Wesley-Rankin Community Center and received the President’s Volunteer Service Award.

Allie Cyr ’08 attended Good Shepherd and J.J. Pearce, where she played varsity tennis. She was inducted into the National Honor Society. Allie went on a four-week trip to Hong Kong, Bali and Australia this summer, where she immersed herself in the local cultures and took surf lessons in Bali.

Trent Hagar ’08 attended Parish Episcopal School and The Episcopal School of Dallas.

Meredith Hessel ’08 graduated from The Episcopal School of Dallas where she was recipient of the Chancellor’s Award. Meredith was recently featured in Preston Hollow People, Kids with Extraordinary Lives, for being awarded Tops in Texas for the Interscholastic League Press Conference Entertainment Review.

Jake Inman ’08 graduated from The Westwood School where he was the school’s official filmmaker and videographer. He worked on the Dallas Fort Worth South Asian Film Festival as a cinema projectionist intern. He was awarded TAPPS State First Place, Color Photography.
David Kerrigan '08 graduated from The Episcopal School of Dallas where he played on the varsity lacrosse team.

Nicole Kimichik '08 graduated from Parish Episcopal School where she served as Student Body President. She was also a member of the National Thespian Society and achieved High Honor Roll. She was a consistent performer in Parish productions, and she was inducted into the National Honor Society.

Jonathan King '08 graduated from The Episcopal School of Dallas where he played varsity baseball for four years and received the President's Community Service Award for four years. Jonathan spends time fly fishing, most recently on the Madison River in Montana.

Ben Krakow '08 graduated from Greenhill School where his activities included cross country and school tour guide, and he worked on The Evergreen, the school newspaper. He also participated in KidSwing Charity Golf Tournament.

Sadie Lidji ’08 graduated from The Hockaday School where she participated in TACT (Teenage Communication Theater) and film. She served as a UNICEF volunteer.

Sydney May ’08 graduated from Booker T. Washington HSPVA where she participated in City Ballet, Powerhouse of Dance. She performed with the Repertory Dance Company, City Ballet Theatre, World Dance ensemble, and DFW Art Awards show. She spent summers at the Boston Ballet School and Joffrey Academy of Dance.

Michael Mosle '08 graduated from St. Mark’s School of Texas where he was a National Merit Finalist, achieved High Honor Roll, and was a Gold Key Award recipient for Alliance of Young Artists. He played football and baseball. He volunteered with Young Man’s Service League and was a Terra Byte instructor for Dallas Independent School District summer camp.

Megan Olschwanger ’08 graduated from Greenhill School where she played volleyball and served as president of the Spanish club.

Cody Patterson ’08 attended The Episcopal School of Dallas and graduated from Dallas Lutheran school where he played football, basketball, and golf.

Ward Rushton ’08 graduated from St. Mark’s School of Texas. He is participating in an internship program at the Center for Brain Health at University of Texas Southwestern.

Philip Smart ’08 graduated from St. Mark’s School of Texas, served as editor of The Remarker newspaper, and participated in the improvisational troupe. He played basketball and volleyball and received Presidential Service Awards.

Ian Stewart ’08 graduated from Cistercian Preparatory School where he served as yearbook editor, played varsity soccer, played as a guitarist in his church band, and participated in musical theater.

Electra Thomas ’08 graduated from The Hockaday School where she played lacrosse and soccer and participated in the community service program Girl Talk.

Gordon Webb ’08 graduated from Jesuit College Preparatory School of Dallas where he received the JCP Excellence in Scripture Award, Principal’s Magis Science Award, and 2015 Community Service Award. He participated in the Martial Arts Black Belt Association and was inducted into the National Honor Society.

Caroline Wilson ’08 graduated from The Episcopal School of Dallas where she played soccer. She received the President’s Volunteer Service Award and participated in National Charity League.

Alums!
We want to hear from you:
Email Advancement at advancement@thelamplighterschool.org by February 1, 2017 to submit entries for the “Alumni Now” section of the upcoming Spring 2017 LampPost. Contacts us any time to schedule a visit.

And be sure to FOLLOW us:
Lamplighter Class of ’08 graduates returned to campus in May for a class reunion. In attendance were 30 alumni high school seniors, many of the past students’ parents, and three beloved teachers: Jody Stout, Kathey Beddow, and Liz Curlin. Cindy Connolly, Parent Relations Coordinator, commented, “The students were all very glad to see their Lamplighter classmates, and the parents had a great time visiting with each other and with students they hadn’t seen in a long time.”

Pre-K teacher Liz Curlin taught two attendees, Noah Conner and Sawyer Lake, back in 2003, and the boys reached out to her prior to the event to ensure she would be there. Both are graduating from Highland Park High School this year, and neither had been back to campus since graduating from fourth grade in 2008. Curlin remarked, “They were so cute reminiscing about the time they first met at the water fountain; apparently Sawyer had been consoling Noah who was sad at the time.” Curlin noticed how happy all of the attendees were to be back on campus, and she said it was a joy to find out which great schools they would attend in the fall to continue their journey of learning. Curlin added, “It was so much fun seeing the alumni on the zip line, the swings, and going through the tunnel, just like when they were little.”

One of the biggest topics of the day was the alums’ discussion about the colleges they would be attending in the fall. Before leaving the event, the high school seniors did not miss the opportunity to take selfies with the old photos on display from when they were students at Lamplighter. Curlin smiled, “Even after 12 years of school, they are still young at heart.” Stout added, “It was such a treat to see our young alumni and discover that they are becoming even more of what we remember about them.”

Thanks to a dedicated and energetic Car Wash Committee led by Jared Steinhart, a sophomore at Highland Park High School, the Sixth Annual Young Alumni Car Wash was a record breaker for number of volunteers, cars washed, and funds raised for Lamplighter.

At 11 a.m. on Saturday, the line of cars ready to be washed wrapped around Lamplighter’s Ring Road. These cars were greeted by our young alumni who offered delicious treats from donors Rusty Taco, Starbucks, TopPot, and Papa Johns. The team soaped, rinsed, and dried cars, which flowed through continuously for three hours.

More than 60 volunteers ranged from Lamplighter’s Class of 2015 (fifth graders), to Lamplighter’s Class of 2008 Seniors. Around noon, Papa John’s donated pizza was served to the volunteers.

“Over a dozen parent volunteers added to the camaraderie as they worked with the young alumni and stopped by to support the day,” said Lamplighter’s Alumni Relations Coordinator Jennifer Heiss, who added, “One of the cleanest cars to leave the lot was Dr. Joan Hill’s, as the kids swarmed at the chance to scrub the Head of School’s car!” She said “laughter, fun, and teamwork” contributed to a highly energetic and fun day of record-breaking fundraising by Lamplighter’s amazing Young Alumni.

Ways to Make Your Donation

Mail: Send your pledge/gift to the school by using the return envelope enclosed with your Annual Fund letter
Online: Click on “Make a gift to Lamplighter” at www.thelamplighterschool.org
Phone: Contact Sandy Diamond at 214-369-9201 x354

All gifts to the 2016 - 2017 Annual Fund must be made before May 31, 2017

The Annual Fund

is the highest fundraising priority at The Lamplighter School. This essential fund supports Lamplighter’s mission and provides direct funding for educational initiatives and operational enhancements that tuition alone does not cover such as:

• The most current, interdisciplinary curriculum materials that are specifically designed for the youngest learners, with a focus on building classroom libraries including the latest published reading units from Columbia University

• Opportunities for faculty members to lead and participate in national and regional conferences where the latest teaching techniques and concepts are learned from world-renowned teachers and then incorporated into their work with our students

• Strategic partnerships and programs with the Dallas Arboretum, the Perot Museum of Nature and Science, and Dallas area universities, which include ongoing research projects that directly benefit classroom learning and that are published in professional journals

• Upgrades to Lamplighter’s classroom technology including:
  - Enhancing our robotics programs with the latest robots and Bee-Bots
  - Strengthening coding programs starting with the youngest students with k-coding as a precursor to SCRATCH coding and engineering programs

• Guest speakers, artists, performers, authors, and illustrators who enrich and enliven the school curriculum

A successful Annual Fund depends on participation from every member of our school community. 100% of trustees, alumni council, faculty, and staff supported last year’s Annual Fund. 100% parent participation is always the goal of the Annual Fund, as well as increased participation from grandparents, alumni parents, alumni, and friends.
The following is a list of individuals whose gifts of time and talent served the advancement efforts of Lamplighter during the period June 1, 2015, to May 31, 2016. The school's continued advancement depends on such committed, energetic, and generous individuals.

Dear Lamplighter Community,

We experienced a productive school year at Lamplighter and it is with gratitude and enthusiasm that we deliver the 2015-2016 Report of Annual Giving. The year drew us closer to completing the goals of the “Lighting Our Path” Strategic Plan and was marked by the public launch of the Igniting Young Minds for a Lifetime of Learning Campaign to Fund People, Place, and Programs in the fall and the breaking of ground for the new barn and Innovation Lab in the spring.

Ever-mindful of our mission in the work we do, I have lifted just a few highlights of the year:

• Annual Fund Co-Chairs, Catie Enrico and Flauren Bender, achieved a record-breaking 99.75% parent participation and raised over $616,000.

• Under the leadership of LPA President, Shannon Morse, “Our Favorite Films” Auction was Chaired by Megan Ratcliff and Co-Chairs Stephanie Byrd, Natalie Johnson, Morgan Kennedy, Jen Lochridge, Tiffany Wilmer. The event raised just over $303,000.

• The LPAs extraordinary volunteer efforts extended into the greater Dallas community through our partnership with COMMIT!

• Alumni Association President, Lilly Albritton ’91, presented Former Board Chair, Karen Pollock, with the Spirit Award for her leadership at Lamplighter, within DISD, and at SMU.

• Campaign Chair, Jennifer Karol, brought us within reach of our $12,500,000 goal with just over $1,700,000 left to raise.

• Young Alumni Car Wash Chair, Jared Steinhart ’09 engaged over 85 middle and upper school alums who raised over $8,000 in support of the Igniting Young Minds Campaign.

These achievements would not have been possible without you, our dedicated donors and volunteers.

Trustees, Life Trustees, parents, grandparents, alumni, alumni parents, faculty, staff, and friends of Lamplighter, thank for your continued belief in the work of the school and for your unwavering support. Together, we are fulfilling the goals of the Strategic Plan and while we have so much more to accomplish, know that it is your generosity that allows us to provide each Lamplighter student a serious education wrapped in the wonder of childhood.

Yours most sincerely,

Sandy Diamond
Director of Advancement
Annual Fund Gifts by Source for 2015–2016

- Trustees, Life Trustees, and Former Trustees: $103,075.00
- Faculty/Staff: $15,072.80
- Parents: $270,365.17
- Grandparents: $26,695.00
- Alumni: $8,082.00
- Alumni Parents and Alumni Grandparents: $26,700.00
- Friends and Former Faculty/Staff: $2,007.00
- Foundations and Corporations: $164,323.20

Total Annual Fund Giving: $616,320.17

All Gifts by Designation for 2015–2016

We have made every effort to give proper credit to all who have so generously contributed to The Lamplighter School during the 2015–2016 fiscal year. We regret any omissions or errors, and request that any such oversight be reported to the Advancement Office at 214-369-9201 ext. 365 or advancement@thelamplighterschool.org.
The following reflects pledges and contributions received by May 31, 2016, to Lamplighter’s Endowed Funds.

**Approximate Total of Permanently Endowed Funds** $6,241,019
In early 2003, Lamplighter established The Founders Legacy Society, which recognizes all donors who have chosen to support Lamplighter through a bequest. The society honors the commitment of Lamplighter’s founders, Natalie Murray and Sandy Swain, whose vision, passion, love of children, and determination created a school where the spirit and joy of learning are ignited in young minds and hearts for a lifetime.

Opening discussions regarding bequests with a few targeted individuals who are prospective donors to the upcoming campaign is an area that we intend to focus on during the 2016-2017 school year.

FOUNDERS LEGACY SOCIETY MEMBERS
To date, the following individuals have notified Lamplighter of their plans for the school:

Gail and Dan Cook
Karen and Kevin Crowder
Samantha and Tim Durst
Sheryl and Eric Maas
Pat Mattingly
Barbara Nichols
Angela and Joel Pittman
Marjorie Waters

Founders Legacy Society

Remembering Dr. Seymour Papert

On July 31, MIT Professor Dr. Seymour Papert passed at the age of 88. During the mid-1980s and early 1990s The Lamplighter School was one of a small handful of beta test sites for Speak and Spell and Logo (an early programming language for elementary children). Dr. Papert worked closely with a team of researchers to develop the first programmable robotics systems for children.

He wrote the following about his time researching at the School:

“The Lamplighter School in Dallas, TX, is the first elementary school where there were enough computers for children to have almost free access to them. The first space shuttle was about to go up, and in the tension of waiting for it appeared in many representations on screens all over the school.

‘Even the girls are making space ships.’ One girl told us. But we noticed that although everyone had space ships they did not make them the same way. Some programmed their space ships as if they had read a book on structured programming, in the top-down style of work that proceeds through careful planning to organize the work and by making subprocedures for every part under the hierarchical control of a superprocedure. Others seemed to work more like a painter than like this classical model of an engineer’s way of doing things. The painter-programmer would put a red blob on the screen and call over her friends (for it was more often, though not always, a girl) to admire the shuttle. After a while someone might say: ‘But it’s red, the shuttle is white.’ ‘Well, that’s the fire!’—came the reply—‘Now I’ll make the body.’ And so the shuttle would grow, taking shape through a kind of negotiation between students.”

Dr. Joan Hill, commenting on Papert’s words, said, “Doesn’t that still seem like our school today? And Papert wrote this all these years ago, but could that just as well be 30 or 40 years hence?”

This is one example of Dr. Papert’s observation of how Lamplighter students work. There are countless other observations that were made by him about our students, curriculum, and faculty. Over the years, retired teacher Sheila McCartor stayed in contact with Dr. Papert who was clearly a man ahead of his time. In 1990, Nintendo gave a significant grant to Dr. Papert’s research group to explore the value of video games in education. Today the web is filled with apps and games for smartphones and computers with a focus on education. Dr. Papert was a force in the progressive education movement, and Lamplighter students, faculty, and staff were fortunate to have benefited from the relationship with Dr. Papert and MIT. He will surely be missed.
Parents: If this issue is addressed to your son or daughter who no longer maintains a permanent residence in your home, please send us the correct address to the school address above or email it to advancement@thelamplightschool.org

**MATTINGLY AWARDED**

Pat Mattingly, throughout her 26-year career at Lamplighter, was a champion of teachers and students alike, advocating and promoting lifelong learning. Lamplighter is thrilled to announce Mattingly as the recipient of the 2016 Award for Excellence in Community Service in the Education category.

The award category is sponsored by Colleagues and Friends of Pat Mattingly and Alumni Families of the Lamplighter School.

Please join us to celebrate Mattingly at the 35th annual Awards for Excellence luncheon

Thursday, November 17, 2016, at the Fairmont Dallas

by purchasing or organizing a table in honor of Mattingly and the other remarkable recipients.
